

Magnet Test & Installation Technician - Full time

Scientific Magnetics is a leading manufacturer of superconducting magnets and helium-free cryogenic systems, based in Abingdon, Oxfordshire. In line with our exciting expansion plans, we are hiring across a number of business-critical functions.

Key Responsibilities

- Test and servicing of cryo-magnetic and cryogenic systems and components.
- Performance of factory acceptance testing with visiting customers.
- Contribution to other areas of manufacturing to meet business objectives.
- Travel to customer sites to commission and service cryo-magnetic and cryogenic systems.
- Performance of site acceptance testing at customer facilities.
- Professionally represent Scientific Magnetics in customer-facing situations.

Personal attributes

- Willing to travel worldwide.
- Able to work to defined timescales and targets.
- Confident and professional communication skills.
- Pro-active, with a can-do approach.
- A team player, with excellent problem diagnosis and solving skills.

Qualifications and experience

Essential experience

- A minimum of 3 years of experience as a superconducting magnet test and/or installation engineer.

Preferred qualifications

- Advanced Modern Apprenticeship
- NVQ Level 2: Electrical and Electronics Technology
- HNC: Electrical and Electronic Engineering
